

CEET Institute

CERTIFIED EXECUTIVE ENGINEER TRAINER

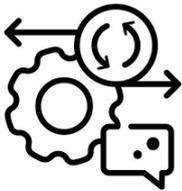

CEET Institute trains and certifies technical trainers. We focus on the effectiveness of knowledge transfer, indispensable for success.

We are the only training institute to help compliance demanding organizations to reach constant high quality training results, so that they can operate safely, economically and effectively.

Introduction to the CEET program

The training program consists of all the didactic skills technical trainers need to possess to give their training programs focus & structure for effective knowledge transfer.

METHOD OF WORKING

The program is characterized by three principles:

- Experience-based training: Practicing is the central component
- Social learning (collaborative learning): People are encouraged to learn from each other
- Supporting theory: Background knowledge and in-depth details help to ensure the experiences are retained

COMPETENCIES

During the CEET - program the following competencies will be highlighted and developed:

- Dealing with knowledge / content in the learning process effectively
- Programming, coordinating and structuring effectively
- Result orientated training
- Making the right didactic choices in order to reach the right results
- Using the right interventions in the group
- Confronting and giving feedback effectively

THE TRAINING IS DESIGNED FOR

- Knowledge-bearing professionals in technical industries, often with a lot of expertise, who need to transfer their specific knowledge effectively and correctly, often due to strict compliance demands
- Trainers with a lot of technical knowledge, who want to learn to focus on soft skills, necessary for transferring that knowledge

CERTIFICATION: PROCEDURE AND CONDITIONS

- The CEET program provides participants global certification by KIWA, leading global certifiers (www.kiwa.com)
- The certification procedure and conditions are described in the CEET certification document

Key outcomes of the CEET training program

ENABLING PARTICIPANTS:

- to apply different didactic work formats required to facilitate demanding learning processes
- to create a safe learning environment
- to use the right interventions to inspire and motivate their participants to learn
- to perform powerful & result oriented in their trainer's role
- to apply interventions designed to contribute to the group's development and the benefits of the learning results

Certify your trainers for Compliance & Success

WHY TRAIN AND CERTIFY YOUR TECHNICAL TRAINERS

We believe that complex technology needs accurate and effective knowledge transfer.

WHAT WE DO

The CEET Institute trains and certifies your technical trainers on the spot, to ensure that they can transfer their specific knowledge effectively and correctly, often due to strict compliance demands, which become more and more important.

HOW WE DO IT

To maximize the effectiveness of the program we work with small groups of maximum 6 participants. The CEET program is conducted by highly experienced facilitators in a live classroom or virtual classroom who are non-stop focusing on the power of the learning process in itself. The length of the live training is 3 consecutive days. The length of the online training is 5 consecutive half days.

KEY BENEFITS OF THE PROGRAM

CEET trainers are able to deploy powerful training instruments, train more effectively and with higher confidence. They can guarantee that their students will have obtained a more proactive approach to safety management and can create a stronger culture of compliance within their organization.

The CEET certificate comes in 3 levels

Yellow Level

Individual oriented

Basic coaching, mentoring and instructing skills for professionals who need to contribute to the performance and development of colleagues.

You'll be certified for 3 years.

Green Level

Group oriented

This level gives you the right tools to transfer necessary knowledge excellently. You learn to inspire within the process and within your didactic role.

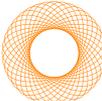

You'll be certified for 3 years.

Black Level

Design oriented

For professionals responsible for the development and positioning of visions on learning processes and ultimate training scenarios.

You'll be certified for 3 years.
